EDUCATION

B.Tech in Computer Science, Specialization in AI & ML, GLA University	2021 - 2025
---	-------------

SKILLS

Technical Skills	Java, Python, Machine Learning, Deep Learning, NLP, Computer Vision
Soft Skills	Communication, Drive and Initiative, Teamwork
Creative Skills	Unity 3D, Game Development

EXPERIENCE

Intern, Dabotics	July 2023 - August 2023
------------------	-------------------------

- Developed and enhanced front-end user interface design using HTML, CSS, and JavaScript.
- Implemented responsive layouts and optimized website performance across various browsers.

PROJECTS: [LINK](#)

Blog Generator Using Gemini	June 2024 Link
-----------------------------	--------------------------------

- Developed an intuitive application to generate engaging blog posts using Google's Gemini AI model.
- Designed a user-friendly interface with Streamlit and integrated secure API connections.

Face and Hand Detection Using Python and OpenCV	Dec 2023 Link
---	-------------------------------

- Engineered a real-time face and hand detection system using Python, OpenCV, and MediaPipe.
- Utilized advanced features to reduce false detection rates and improve overall performance.

Subway Surfer-like Game Using Unity 3D	Feb 2024 Link
--	-------------------------------

- Created an endless runner game with Unity 3D, integrating Unity Store assets and Mixamo animations.
- Engineered game mechanics and dynamic obstacles with C# scripting to enhance gameplay.

WhatsApp Chat Analyzer	Jul 2024 Link
------------------------	-------------------------------

- Designed a WhatsApp chat analyzer using Python and Streamlit to generate in-depth insights.
- Implemented features for comprehensive statistics and visualizations to improve analysis efficiency.
